## WEB DEVELOPMENT EXPERIENCE

### Camping website

[View code](#)

[View website](#)

The website for creating and sharing campgrounds with other users. The app is fully responsive and made by Node.js, express.js, MongoDB. Contains user authentication system, Mapbox API and Cloudinary for storing images uploaded by users.

#### Used technologies:

HTML5, CSS3, JavaScript, EJS, Node.js, express.js, MongoDB, Bootstrap

### React.js website

[View code](#)

[View website](#)

The website created by using React library. The main React features applied are React Hooks and React Router. Page transitions are made with Framer Motion. The website is fully responsive.

#### Used technologies:

HTML5, CSS3/SCSS, JavaScript, React, React Router, Framer Motion

### Blog website

[View code](#)

[View website](#)

It is a personal blog website made by Node.js and express.js. Includes admin authentication system powered by passport npm. The posts, that are created by admins, and their accounts are connected to the MongoDB database. To give more freedom to the person writing a blog post, the TinyMCE WYSIWYG editor was installed. Administration pictures are automatically stored on Cloudinary API.

#### Used technologies:

HTML5, CSS3/SCSS, JavaScript, EJS, Node.js, express.js, MongoDB, Bootstrap

### Languages:

English	○○○○○
Lithuanian	○○○○○
Swedish	○○○
German	○○
Russian	○○

Driving licenses: AM, B, B1

### Personal portfolio website

 [View code](#)

 [View website](#)

This is my personal portfolio as a web developer. It is fully responsive and made with SASSY CSS only, without any CSS frameworks.

#### **Used technologies:**

HTML5, CSS3/SCSS, JavaScript

### To-Do web app

 [View code](#)

 [View website](#)

This app is created by using React library. The main feature applied is React Hooks. It is possible to add, delete, update and mark a task as completed.

#### **Used technologies:**

HTML5, CSS3, JavaScript, React, React Hooks
